

THIS is the Future!

Retail isn't dead but it is changing. You will need to change with it. Despite some retailers facing bankruptcy this year several brands have adapted and are experiencing strong growth. Retail as it has been is no longer sustainable and every retailer and brand is now looking for ways to incorporate technology into their business.

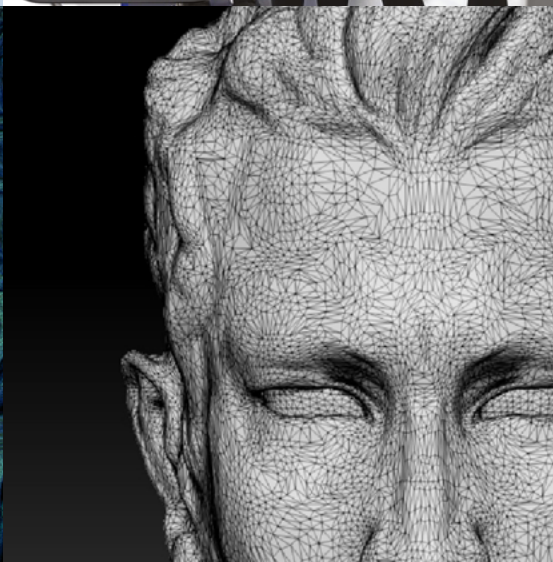

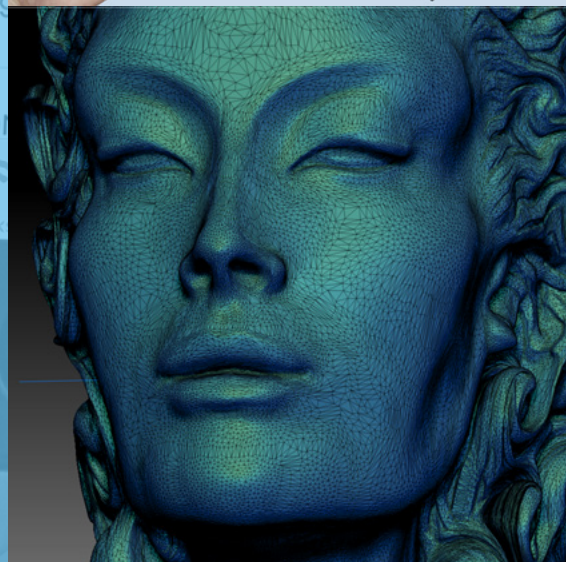

We have the perfect solution for you: Iconeme!

Our user friendly technology will bring you to the cutting edge and allow you to engage customers in new and exciting ways. Not only will your mannequins now be able to talk and interact with your customers 24/7 but you'll be able to expand beyond the walls of your store and offer customers endless aisles of merchandise.

Don't use mannequins in your stores? No problem! Iconeme can be used all by itself (or we can design a fixture based on your store design).

ROUNDED COLLAR COAT
